## **Harlingen Announces Free Internet at Destination Park**

**HARLINGEN, Texas** –Harlingen’s brand new Lon C. Hill Destination Park now has free Wi-Fi Internet. This week, City of Harlingen Management Information System staff finished installing the necessary equipment to offer free internet to park users.

The average connection speed is 21 Megs throughout the park and using it is simple. Once the Wi-fi is enabled in a device, the user will select “LCH Park Wi-Fi” from the pop-up menu. No password is required.

The internet will work while inside the park and disconnect by itself once the user leaves the park.

This is the first public Wi-Fi connection at City Parks and the MIS staff hopes to eventually offer free internet at all City Parks.
